

CRASH CASE STUDY #1
WRONG WAY WILLY

Car Driver Statement

I was driving home. A boy on a bicycle was riding toward me in my lane. There was another kid sitting on his handlebars. I had to swerve to avoid him but he lost control of his bike. He could have been badly hurt, he's just lucky I didn't hit him.

Bike Rider Statement

My friend and I wanted to go to the store. It was only a few blocks away so I thought I didn't need my helmet. He didn't have his bike so I gave him a ride. I always ride facing traffic so I can see what is coming but I couldn't see around my friend. I tried to avoid the car but I guess I lost control.

What could Willy and his friend have done differently to avoid an accident? What safe cycling skills does Willy need to learn? Write your answer in complete sentences.
